- Enhancing tax compliance through taxpayer education prompt and quality services while on field.
- Knowing the taxpayer's activities and complaints (thoroughly well) in order to gather variable information so that quality and correct assessment are issued.

The Bloc Management system will lead to an easy identification of taxpayers, which will help in registration and education on their rights and obligations. This will also help in the preparation of trainings and consultative meetings according to their level and sector of activities.
The major aim of this is to give" Quality and courteous services to taxpayers".

In RRA, we promote "Partnership for business growth".

THE REPUBLIC OF RWANDA

RWANDA REVENUE AUTHORITY

THE ESTABLISHMENT OF BLOCK MANAGEMENT

INTRODUCTION

As one of the strategies to reduce the ever rampant informal sector and to enhance taxpayer's compliance in Rwanda by a close taxpayers education at their premises, RRA has decided to introduce the Bloc management system. The Bloc Management system (BMS) is a way of managing small taxpayers by demarcating the areas in which they conduct businesses into sizeable and manageable areas called Blocs. A Bloc is divided into Sub Blocs or zones. It is a kind of decentralization of the tax administration in order to offer better and quick services to taxpayers on one hand, and to mobilize tax revenues more efficiently on the other hand.

HOW IS A BLOC STRUCTURED?

A Bloc is managed by a team of tax officers and other required support members. The Bloc Management System started in Kigali City in the centers of Nyabugogo and Gatsata, and then will be rolled out to the rest of the country.
Currently, RRA has identified and demarcated 3 Blocs and 10 Sub Blocs in Kigali City. The names and demarcations of Blocs and Sub Blocs/ zones are in line with the local administration boundaries whereby a Bloc coincides with a District and a Sub Bloc is comprised of 2 or more sectors depending on the importance of existing trade centers inside the zone.

The considered Blocs are shown in the table bellow:

BLOC & DISTRICT	SUB BLOCS
BLOC I: NYARUGENGE **NYARUGENGE DISTRICT**	**Sub Bloc 1:** - Gitega, Nyamirambo, Rwezamenyo, Kigali, Mageragere **Sub bloc 2:** - Kimisagara, Kanyinya, Nyakabanda **Sub bloc 3:** - Muhima, Nyarugenge
BLOC II: KICUKIRO **KICUKIRO DISTRICT**	**Sub Bloc 1:** - Gahanga, Kagarama, Niboye **Sub Bloc 2:** - Kanombe, Nyarugunga, Masaka **Sub Bloc 3:** - Kigarama, Gikondo, Gatenga, Kicukiro
BLOC III: GASABO **GASABO DISTRICT**	**Sub Bloc 1;** - Gatsata, Jabana, Nduba, Jali **Sub Bloc 2:** - Gisozi, Kinyinya, Kacyiru, Kimihurura **Sub Bloc 3:** - Remera, Kimironko **Sub Bloc 4:** - Bumbogo, Rutunga, Ndera, Rusororo, Gikomero

ACTIVITIES INVOLVED IN BLOCS AND ITS ADVANTAGES BOTH TO TAXPAYERS AND RRA.

WHAT ARE ADVANTAGES OF BLOC MANAGEMENT SYSTEM?

The Bloc Management system has numerous advantages for the institution and taxpayers such us:

- Communicating openly, accurately and regularly to taxpayers so as to create transparence and compliance between RRA and taxpayers;
- Facilitating easy registration of traders into the system through field visits and a close education on a daily basis;
- Facilitating taxpayers to pay their taxes in Blocs without coming to the Head Office. This will reduce the long queues and taxpayers will get better services;
- Audits will be planned in accordance to respective blocs.
- Ensuring that correct and quality assessment are made and issued to taxpayers;
- Widening the tax base and thus increase revenue contribution to the national budget;
